Greetings!

This letter is to provide feedback for my previous students. I met my students last February 15, 2021 and as their teacher, I could say that they were good students. I was impressed and pleased with how they persevere in class and kept on working hard to achieve their goals.

Despite the lack of experience and confidence in using English, they kept on trying their best to fulfill the tasks, and participate actively in class. Students such as S [REDACTED], K [REDACTED] and H [REDACTED] remained positive and diligent in class even if their struggle with the use of the language was evident at times. Their willingness to learn more and improve their skills was very evident during the discussion and could be seen with the results of their outputs.

I highly appreciate all of their efforts, and I know that with their passion, they would be able to successfully improve their skills with more practice and exposure to the language.
